# Speed of Light

## Corbin Bleu

You Ready?
Yeah AlrightYeah, Yeah, Yeah
C'mon
Yeah, Yeah, Yeah
C'monYou can lie if you want
But it's in your eyes
Your heart is calling for me tonight
You're feeling me crazy, you can't deny
So I'm coming over at the speed of lightLet me break it down here's the scenario
I'm single, you're available
I am a simple dude I ain't got to have it all
Maybe one date, a couple phone calls
Now I see that you're playing your position
Real laid back, real distant
But your body seems oh so different
I can't tell that I'm in your systemAnd I know that you like what you're hearing
'Cause your heavy breathing
Tells me that you're feeling what I'm feeling too
So there's no need to play games
When I know you feel the same
Baby, it don't matter what u doYou can lie if you want
But it's in your eyes
Your heart is calling for me tonight
You're feeling me crazy, you can't deny
So I'm coming over at the speed of lightSpeed of Light (x 3)Still on the phone, still waiting
But I am not going to trip I got patience
What's the problem what's the hesitation
I'm saying girl can I get a date, yeah
Now you got me on the edge of my seat, girl
Got me wondering what's it gonna be girl
Let me let me know when we gonna meet, girl
Tell me, what are we girl?And I know that you like what you're hearing
'Cause your heavy breathing
Tells me that you're feeling what I'm feeling too
So there's no need to play games
When I know you feel the same
Baby, it don't matter what u doYou can lie if you want
But it's in your eyes
Your heart is calling for me tonight

You're feeling me crazy, you can't deny
So I'm coming over at the speed of lightSpeed of light (x3)And I know that you like what you're hearing
'Cause your heavy breathing
Tells me that you're feeling what I'm feeling too
So there's no need to play games
When I know you feel the same
Baby, it don't matter what u doYou can lie if you want
But it's in your eyes
Your heart is calling for me tonight
You're feeling me crazy, you can't deny,
So I'm coming over at the speed of lightSpeed of light (x 3)
At the speed of light (x 8)Speed of light
