

# I Don't Know

## Meth Wax

There's so much that I can take,  
Because the toxic chemicals inside my brain  
But every time I see your face  
You have my heart exploding at a rapid pace  
But I don't Know  
All i hope is you'll never let me go  
Oh please stay  
I promise to you that I can change

There's so much swimming in my mind  
I'd like to pray that every wound will heal with time  
And though I'm hanging from a thread  
You're the only one that's stuck inside my head

But I don't know  
All I hope is you'll never let me go  
Oh please stay  
Well I promise to you that I can change

And when you whisper in my ear  
And tell me about all you're fears  
I can't help feeling like I'm useless

But when you have me in a bind  
Your sending shivers down my spine  
That stem from all of your kisses

But I don't know  
All I hope is you'll never let me go  
Oh please stay  
Well I promise to you that I can change

But I don't know  
All I hope is you'll never let me go  
Oh please stay  
Well I promise to you that I can change
