Someday

David Gates

Love me
Forget about tomorrow now and love me
There's time enough to borrow from another day
So just for now
Let's touch and do the things that drive my cares awayHold me
Forget the world outside tonight and hold me
And by the flickering candle light
Our love will glow
And then we'll share the words and feelings no one else will ever knowWe should never end
Hand in hand we'll walk the night forever
But if it can't be so
There's one more thing I need before I goJust kiss me
And tell me when I'm gone how much you miss me
Forget the lonely in between
And then someday
We'll open up our eyes and see the world we thought so far away
Someday, someday
