

# Pay It Forward

[Rick Springfield](#)

Not much in common for you and me  
But the upside is we can celebrate differently  
Ain't worth the drama, ain't rocket science  
If we begin with love we can make it unconditionally  
If you've taken a look at the news at nine  
Opened the book and you've seen the sign  
You've gotta believe it's time to  
Give it away, give it away, darling  
Don't hold on tight when we can  
Give it away on every corner  
Try to make this world much warmer  
Give it away, give it away, turn that  
Great ship around, sail it shoreward  
Just stand your ground and pay it forward  
The thunder's shaking above you and me  
But the flip side is we can make electricity  
Ain't worth the drama, ain't in defiance  
Don't complicate, it's the art of simplicity  
When there's nothing in sight and you're lost at sea  
Alone in the night and there's no Plan B  
The timing is right to say, come on  
Give it away, give it away, darling  
Don't hold on tight when we can  
Give it away on every corner  
Try to make this world much warmer  
Give it away, give it away, turn that  
Great ship around, sail it shoreward  
Just stand your ground and pay it forward  
Give it away, give it away, darling  
Don't lose the fight when we should  
Give it away on every border  
Burn the fires and make it warmer  
Give it away, give it away, girl  
Don't ever lose sight, hold your corner  
So much in common with you and me  
You know it's true, only love will ever set you free  
Give it away, give it away, darling  
Don't hold on tight when we can  
Give it away on every corner  
Try to make this world much warmer  
Give it away, give it away, turn that  
Great ship around, sail it shoreward  
Just stand your ground and pay it forward  
Give it away, give it away, darling  
Don't lose the fight when we should  
Give it away on every border  
Burn the fires and make it warmer  
Give it away, give it away, turn that

Great ship around, guide it shoreward  
Just stand your ground and pay it forward  
Just turn around and pay it forward  
So stand your ground and pay it forward
