

# Make That Move

## Shalamar

So many times  
By holding back I let the good things pass me by  
And then one day I asked myself the reason why  
And like an answer from above you came into my life

And showed me one thing for sure  
With love nothing is certain  
You got to go for it when you feel it  
Everybody, everybody needs somebody to love  
And I choose you, baby, so let's

Make that move right now, baby  
You only go out once in a lifetime  
Make that move right now, baby

So natural to  
Give in to feelings deep inside when love is due  
And I knew something was missing 'cause I feel brand new  
And motivation's in my heart whenever I'm with you

So girl whatever you do  
Just remember love is a motion  
You got to hold on tight  
When you know it's right  
Everybody, everybody needs somebody to love  
And I choose you, baby, so let's

Make that move right now, baby  
You only go out once in a lifetime  
Make that move right now, baby  
The longer you wait on love, the more you'll be without it

Why don't you  
(Make that move) (Make that move) Make that move  
(Make that move) (Make that move) Make that move  
(Make that move) (Make that move) Make that move  
(Make that move) (Make that move) Make that move  
Let's make that move

(Make that move) (Make that move) Make that move

(Make that move) (Make that move) Make that move  
(Make that move) (Make that move) Make that move  
Come on  
Let's make that move

So many times  
By holding back I let the good things pass me by  
And then one day I asked myself the reason why  
Like an answer from above you came into my life

And that showed me one thing for sure  
With love nothing is certain  
You got to go for it  
When you feel it  
Everybody, everybody needs somebody to love  
And I choose you, baby, so let's

Make that move right now, baby  
You only go out once in a lifetime  
Make that move right now, baby  
The longer you wait our love, the more you'll be without it

Make that move right now, baby  
Make that move right now, baby  
Make that move right now, baby  
Make that move right now, baby

Make that move right now, baby  
Make that move, you've got to make that move  
Make that move right now, baby  
Come on, baby, come on, pretty baby

Make that move right now, baby  
I just want you to make that move right now  
Make that move right now, baby  
If you make that move with me, I'll be yours eternally

Make that move right now, baby  
Make that move right now, baby  
Make that move right now, baby  
Make that move right now, baby
