[Ben Lee](#)

Shoulda seen that girl on the radio
Made me think of the time I tried to rhyme
And failed miserably that time
On the radio, passed the time Shoulda seen me trying to talk to you
So you'd think I was cool but I'm not
And I guess you found that out
On the radio, passed the time Said I'd tell you everything
Or every but that one thing
I tried to weasel my way out
You shouldn't have found out that way I shoulda sat you down and explained
I thought that there would be no way
You'd find out on the radio Shoulda seen me sink not swim
Made me think of a rat that's trying to climb
Even though it know it's doomed
On the radio, passed the time Shoulda heard me what a fool
Made me think of the time I tried to rhyme
And failed miserably that time
On the radio, passed the time Said I'd tell you everything
Or every but that one thing
I tried to weasel my way out
You shouldn't have found out that way I shoulda sat you down and explained
I thought that there would be no way
You'd find out on the radio
