Sunshine in the night

You're makin' everything worthwhile

You know I need your love

Pretty lady, help me now

But do you love me

I got to know, I've got to know nowOh, long ago I had a lady

She looked alot like you

She lied to my face, yeah, such a disgrace

I had to leave, couldn't play the fool

Here I am again in love, baby

I've been this way before

I need your touch, need it so much

I need you, I need you, I doBaby baby, be my friend

You know I'm gonna love you all I can

Before the dawn is breakin'

I'm gonna change your mind, yeah yeah

And you'll love me baby, come on love me

Come on loreleiIf you spent a lifetime thinkin' 'bout the day

Would you know how many nights I've cried

I see your face in my mind, I've tried but I just can't find

A way, I need you bad

Babe, you're tearin' me apart

You know, you know I gave you

Every little piece of my heartBefore the dawn is breakin'

I'm gonna change your mind, yeah yeah

And you'll love me baby, come on love me

Come on lorelei
