

It's About Time

Linda Ronstadt

It only seems like yesterday
You got a restless look
Said goodbye in the same old way
Like I knew you would You remember, do you remember
Everything we said
Promise made with a kiss for sure
Like a book I read It's about time you came back anyway
It's been a long long time
Been alone most every day
You've been on my mind I always wondered where you went
To find some peace of mind
You never seemed to give much thought
To leaving me behind You remember, do you remember
Everything we said
Promise made with a kiss for sure
Like a book I read It's about time you came back anyway
It's been a long long time
Been alone most every day
You've been on my mind It's about time you came back anyway
It's been a long long time
Been alone most every day
You've been on my mind
You've been on my mind
