

Night On the Town

Ten Feet Deep

Advisory - the following lyrics contain explicit language:

Don't cry now it seems
You have found another's dream again
And love in loss, is found now and then
Time spills you slip ahead
Glory meets you at the brink they said
You'll learn to glide, as you face the sky
Success in failure is the skill of
Controlling how you think
Night on the town will do me good
You'll meet a fox just like you should
Say she has soul and move ahead
All while I dream of you instead
You can't avoid the spell
Reason dies and passions yell in tongues
And I'm so blind, but I hear them and run
Straight back to you I go
Spiral course through the undertow of the past
Entranced and numb, sea of memories last
Success in failure is the thrill of
Controlling how fast you sink
Night on the town will do me good
You'll meet a fox just like you should
Say she has soul and move ahead
All while I dream of you instead
Cause you saw too far ahead
It scared you so you turned away
Not to be mislead
By signs I would come to replay
Cruellest truths unsaid
Ricochet in my brain
Like a twisted pinball game
Night on the town will do me good
You'll meet a fox just like you should
Say she has soul and find a bed
And then I dream of you instead
