

# Little Sister

## Queens of the Stone Age

Hey sister why you all alone?  
I'm standing out your window  
Hey little sister, can I come inside, dear? I wanna show you all my love  
I wanna be the only one  
I know you like nobody ever, baby Little sister can't you find another way  
No more livin' life behind the shadow  
Little sister can't you find another way  
No more livin' life behind the shadow You whisper secrets in my ear  
Slowly dancing cheek to cheek  
It's such a sweet thing when you open up, baby They say I'll only do you wrong  
We come together 'cause I understand  
Just who you really are, yeah baby Little sister can't you find another way  
No more livin' life behind the shadow  
Little sister can't you find another way  
No more livin' life behind the shadow I shake up
