Splattered Cavities

Carcass

Erupted thoracic savies
Serum, pus and offal
Perspiring ulcerous chancre
Splattered on your wallNecro-cellular lesions
The stench of staining scabs
Scraped up by medics
And wrapped in plastic bagsExploding pus and bile
Abdominal saliva sprays
Coughing out your intestines
And rubbing them in your faceCarbuncles oozing sanguous
Mortified entrails and rot
Pieced together for autopsy
In your wooden boxFrantic pelvic gut-wrench
Splattered guts and gore
Seeping disembowelment
Mopped up off the floorPelvic insides now rest in your perineum
Splattered gore seeping from your orifices like hot sebumPancreatic juices
Internal digestive mess
Acidic dripping spittle
And squelching moist fleshPulverized thoracic cavity
Your rib-cage is snapped
Rupturing internal organs
Crushed in your diaphragmYour lungs are collapsed
As your abdominal cavity is splattered
Terminal back-ache paralyzing
As your spine is shattered
