This Time

Shirley Bassey

No more crying for help, no more blaming myself
Hypnotized, too much figuring out
Too much standing my ground
No pride left to be proud, only fear

Didn't know who it was in the mirror last night
So I left here with nothing to lose
Every step didn't just take me further away
Every step took me closer to finding you

I know this time's the time, the time for love
And it's right here in front of my eyes
I know this time's the time
You only get once in your life

No more trying to break free, no more apologies
No more finding my feet just to fall
Every dream didn't just take me further away
Every dream took me closer to finding you

I know this time's the time, the time for love
And it's right here in front of my eyes
I know this time's the time
You only get once in your life

Left a lot of courage behind
That I won't be needing this time
'Cause I can be true
I can be one, I can be strong

I know this time, the time
You only get once in your life

I know this heart's the heart, the heart I'm keeping
For the love I thought I'd never find
I know this times forever
For worse and for better

This time, this time
This time

This time
This time
