## Sugar Ray

I am

Yeah

You will recover when you discover baby

There is no other when you recover baby And when the mood is right you'll get it every night

Go on and play it light your on the other side

Your beautiful you saw me

Your beautiful its me I will let you

I will let you down

All right Into another don't run for cover baby

There is no other into another baby

And when the time is right

I got you in my sight

I'll reach into your life and look around inside Your beautiful, you saw me

Your beautiful, its me

I will, let you, I will let you down Your beautiful, you saw me

Your beautiful, its me

I will, let you, I will let you down
