AmoebaAmoeba  
Amoeba  
Amoeba  
AmoebaWe are the scientists in the lab  
Looking through a microscope  
The little glass slides they never lie  
How can this small mind cope?I've never seen anything like it before  
This amoeba's got a mind of it's own  
But don't turn your back you stupid science world  
This is reaching for the telephoneAmoeba  
Amoeba  
Amoeba  
AmoebaAmoeba  
Amoeba  
Amoeba  
AmoebaA one celled creature, a one celled thing  
It hardly knows it's alive  
You're better off dead if you only knew  
Your growing life is taking a diveI've never seen anything like it before  
This amoeba's got a mind of it's own  
But don't turn your back you stupid science world  
This is reaching for the telephoneAmoeba  
Amoeba  
Amoeba
