

# Follow That Star

**Paul Baloche**

In the quiet of the night  
is a wide expansive sky  
I am alone and asking questions why  
What's this longing in my heart  
what's the reason for my life  
and the solitary light , shining, calling  
Follow that star, follow that star  
Discover the mystery of who you are  
I've searched for a lifetime  
I've come from afar  
and discovered my destiny  
just to follow that star  
Like the light of early dawn  
see the promise there beyond  
and a hope within begins to rise  
Well this longing (?) to my heart  
Reaching deep into my soul  
and reveals to me the reason , for living
