

Less Than Pure

A-ha

We're going to go downtown
I hear this great new place has opened up
And when we get there
I don't know it's taken ages
Don't you know?
How long, how long will this go on?
How long, how long time drags on?
How long I find I can't go on much longer now?
But the place in question's hard to find
Not a cab ride to the door
As you wonder in your doubtful mind
Is it really worth all that and more
We seem to be a little lost or something
I'm not really sure about the choice we're making
The toil it's taking on
How long, how long will this go on?
How long, how long the time drags on
How long I find I can't go on much longer now
But the place in question's hard to find
Like an illness with no cure
And our heads are getting wearier
And our hearts are less than pure, less than pure
How long I find I can't go on much longer now?
And the place in question's hard to find
Not a cab ride to the door
And our heads are getting wearier
And our hearts are less than pure
Less than pure
Less than pure
Less than pure
Less than pure
