

Bears

Andrew Peterson & Randall Goodgame

Some folks say there ain't no bears in Arkansas
Some folks never seen a bear at all
Some folks say that bears go around eating babies raw
Some folks got a bear across the hall
Some folks say that bears go around smelling bad
Others say that a bear is honey sweet
Some folks say this bear's the best I ever had
Some folks got a bear beneath their feet
Some folks drive the bears out of the wilderness
Some to see a bear would pay a fee
Me, I just bear up to my bewildered best
And some folks even see the bear in me
Some folks drive the bears out of the wilderness
Some to see a bear would pay a fee
Me, I just bear up to my bewildered best
And some folks even see the bear in me
So meet a bear and take him on out to lunch with you
Even though your friends may stop and stare
Just remember that's a bear there in the bunch with you
And they just don't come no better than a bear
So meet a bear and take him on out to lunch with you
Even though your friends may stop and stare
Just remember that's a bear there in the bunch with you
And they just don't come no better than a bear
No, they just don't come no better than
No, they just don't come no better than
No, they just don't come no better than a bear
