

# Our Sun (feat. Zebra Katz)

## Kura

Hey

Ooohh

I see the sun shining from my star. I want to go there. Hearing a howl from the wave. Uh hoh. Go inside, that's right over the hill. Just now she sits still. Praying, then she howls to the sun. Tell it to the stars that I'm am not so far, not so far away from where you are. Tell it to the stars that I am not so far, not so far away from where you are.

From the freckle in my left eye, can you see my light shine? Brighter than the moon eye. Sweeter than the first time. Darker than when you can't find an ancient verse of lost rhymes. Story of the star sign. Tell me is it our time? Shout out to the universe. Im diving in head first. Rainfall or cloud burst. New moon or old curse. Foreign tale of rebirth. Light beams across earth. Reaching out to you first. I could feel life force. Your energy's my light source. Your enemy's a dark horse. I could see the sun in you first. I could see the sun in you first. I could see the sun in you first.

Tell it to the stars that I'm am not so far, not so far away from where you are. Tell it to the stars that I am not so far, not so far away from where you are.

I could see the sun in you first. (Ã—8)
