Over The Edge

Fu Manchu

Keep it centered, keep it low
Keep it runnin', let's go
Watch it climb on its own
The more we see, the more we know
We know, we knowFour wheels and a lift
What we gave, we get
The convoy was down
There was nothing left, no one aroundWe strapped ourselves in tight
We were the first and we're alright
It's movin' way too fast
Now shut the doors and hit the gasSo over the edge, I lift my head, they said
So over the edge, I lift my head, they said
So over the edge, I lift my head, they said
So over the edge, I lift my head, they said, they saidI soon realized
I remembered, back in time
What was rollin' along
Movin' circle, on and onAn image so small
We heard the word, we heard the call
Let's keep our story straight
It doesn't matter, it's way too lateSo over the edge, I lift my head, they said
So over the edge, I lift my head, they said
So over the edge, I lift my head, they said
So over the edge, I lift my head, they said, they saidKeep it centered, keep it low
Keep it runnin', let's go
Watch it climb on its own
The more we see, the more we knowThe more we see, the more we know
The more we see, the more we know
The more we see, the more we know
The more we see, the more we know
The more we see, the more we know
We know, we know
