# No Brain

## MF DOOM

Give her milk, milk and cookies give her everything
Even cooties that girl's insane
Suprised she even knows my name since the day we met that girl's
Got no brain there was something strange
Something strange about her she never spoke a word
Or moved a muscle that girl's insane
Surprised she even knows my name since the day we met
That girl's got no brain I browse to make up words to write up
A note I haven't decided what they'll be I got this problem
And I don't know why she got no brains and she's left me for another guy
