One Step Into The Light

Moody Blues

One step into the light, one step away from night
It's the hardest step you're gonna take
The ship to take you there, is waiting at the head
Of the stairs that lead up through your opened mind
Above the dark despair, shines a light that we can share
Close your eyes and look up in between your brows
Then slowly breathing in, feel the life force streaming in
Hold it there, then send it back to him
All the old things are returning
Cosmic circles ever turning
All the truth we've been yearning for
Life is our savior, savior, savior, save your soul
The river of living breath, is flowing through the sun
He was there before the earth began
The world will drag on you, use his love to pull you through
Find the mission of your life and start to be
All the old things are returning
Cosmic circles ever turning
All the truth we've been yearning for
Life is our savior, savior, savior, save your soul
There's one thing I can do, play my Mellotron for you
Try to blow away your city blues
Your dreams are not unfound, get your feet back on the ground
The truth will set us free, we cannot lose, we cannot lose
We cannot lose, we just have to choose, we cannot lose
