

My House

Tokyo Police Club

Someone I know, very very well, is spilling my secret
They're underneath my spell
Someone I like, maybe just a little bit, is making me seasick
Its funny how you can tell
Any old day now
Any old day now
Any old day now
The truth is gonna come out
I could see it from my house
I could see if from my house
You were screaming your heart out
You were screaming your heart out
Whatever you do I guess it doesn't matter, if no one else knows it
Did you even think twice?
Whatever you want, just come out and say it, and you can just have it,
Do you really feel bad?
Any old day now
Any old day now
Any old day now
The sun is gonna come out
I could see it from my house
I could see it from my house
You were screaming your heart out
You were screaming your heart out
I just can't keep it down
I just can't keep it down down down down
I could see it from my house
I could see it from my house
You were screaming your heart out
You were screaming your heart out
I could see it from my house
I could see it from my house
You were screaming your heart out
You were screaming your heart out
