Mars

Kelis

Earth to your brain Yo, yo, yo, yo

Yo, yo, Houston I think we have a problem

Yo, yo, I think we have a problem

Yo, yo, we have a problem

Yo, yoDays, you know those days

When everyone seems to aggravate you

Unfazed, fucked up ways

Don't try to ignore, you know that it's true

See you say to yourself that you really don't wanna deal

And this day to day action on Earth just don't appealYou know how hard you try

You've been known to take so much

They shoot at you cause you're fine

Bite the bullet I know that it sucks

If security's thin then faith will pull you through

If you still angry follow me

And do what I doDo you hear what I'm talking 'bout?

Do you hear we can conquer the world?

Got this whole world running from

This love between a boy and a girl

They're afraid of this chemistry

Plus the speed of light of laser guns

They go

To the light in every oneThere you want some friends

Seems like everybody has friends

Depends on what you call friends

You don't really care you just want one

It's a person full of feelings but nobody's there

But you have to ask yourself if they were

Would they really care?

They do bullshit some times

They do the things that you've done

They're people just like you

But tell me do you want one

98 percent of faith won't follow through

Don't you know real magic comes from the other two? Do you hear what I'm talking 'bout?

Do you hear we can conquer the world?

Got this whole world running from

This love between a boy and a girl

They're afraid of this chemistry
Plus the speed of light of laser guns
They go

To the light in every oneDo you hear what I'm talking 'bout?

Do you hear we can conquer the world?

Got this whole world running from

This love between a boy and a girl

They're afraid of this chemistry

Plus the speed of light of laser guns

They go

To the light in every oneIt was last week we were watching TV My boyfriend wanted to watch channel three

Then he started to freak

The news flash came on then

So I said hey, my popcorn's burning

Hey, why is the channel turning?

Hey, that was NASA what did they want

Hey, yo just pass the blunt

I was so high that I didn't realize what they said

Plus my eve vision fried

If it's not then it's messing with my head

Hey, you can't be serious

Hey, but I need my contacts

Hey, float and spin

Hey, so I turned and I said, shitDo you hear what they talking 'bout?

About to send your black ass to Mars

That's exactly what I'm talkin' bout

Money, science, space, and mars

Till someday you got that million

Just because you've been hanging with stars

Wake up, wake up, wake up

And send your black ass to MarsDo you hear what I'm talking 'bout?

Do you hear we can conquer the world?

Got this whole world running from

This love between a boy and a girl

They're afraid of this chemistry

Plus the speed of light of laser guns

They go *laser sounds*

To the light in every one Yo, yo, yo

Yo, nigga-nigga, yo

Yo

Yo, Star Track, yo, yo (ha-ha)

Yo, Kelis, yo, Neptunes, yo

Earth to your brain, yo

UFO, who knows?

Earth to your brain
What is it already closed?
You're fucked
