My Imagination

Bill Withers

when you appeared in my imagination
i had no idea that you would ever be real
now you're my life
not just some fascination
and i love you now that you're real
now that you're real
not my imagination
someone to love and i do love you dear
long before love you were here in my memories
and i love you now that you're here
and now my dream talks to me
and fixes my coffee in the morning
rubs my back when i'm weary, thank you dear
i love you now that you're here
