

Blackout

Heidi Montag

You and me are one in the same
It's the one thing that they can't change
Whoa, whoa
You and me in it for the ride
I'll take the drop if you're by my side
Whoa, whoa
I'm hearing them saying we're wrong for each other
I'm taking my chances for worse or for better
Why can't they see some thing's are meant to be?
Blackout the satellite, where should we run to?
Let's get invisible boy and if you want to
Go somewhere no one can find us, we can get out of here
Whoa, oh, oh, oh
Blackout the satellite and be my lone star
You wont need anything else, I'll show you my heart
Let's leave this city behind us, we can get out of here
Let's go
Underground and get lost with you
Only way from my point of view
Whoa, whoa
Whoa, oh, oh, oh
Leave the rest of them in the dark
No one has to know where we are.
Whoa, whoa

I'm over the stories that we'll never make it
When I think of losing you, baby I hate it
Why can't they see, it's between you and me?
Blackout the satellite, where should we run to?
Let's get invisible boy and if you want to
Go somewhere no one can find us we can get out of here
Whoa, oh, oh, oh
Blackout the satellite and be my lone star
You wont need anything else, I'll show you my heart
Let's leave this city behind us, we can get out of here
Don't know where we'll be tomorrow
But I know how I feel right now
They don't have to understand but baby if you take my hand.
Let's go

Blackout the satellite, where should we run to?
Let's get invisible boy and if you want to
Go somewhere no one can find us, we can get out of here
Whoa, oh, oh, oh
Blackout the satellite and be my lone star
You wont need anything else, I'll show you my heart
Let's leave this city behind us, we can get out of here
Let's go
Blackout the satellite, where should we run to?
Let's get invisible boy and if you want to
Go somewhere no one can find us, we can get out of here
