

Down (Alone on the Avenue)

Champs

You stand on the floor all night and your friends stand under the light
The medicine rolls around your eyes and you feel it every time
The light comes on, the light comes on, the
darkness fades away
The light comes on, the light comes on, for most of every day
Only to be with you, down alone on the avenue
Only to be with you, down alone on the avenue
You ride home in the dark under the moon
See that golden hillside burn, and you know I'll see you soon
Your eyes make me part like glass and your words
fall out of the sun
Change on ??? pass and I feel your heart on the run
The light comes on, the light comes on, the darkness fades
away
The light comes on, the light comes on, for most of every day
Only to be with you, down alone on the avenue
Only to be with you, down alone on the avenue
You ride home in the dark under the moon
See that golden hillside burnt and you know I'll see you soon
You ride home in the dark under the moon
See that golden hillside burnt and you'll know I'll see you soon
You see that frozen hillside burnt like gold and
the day will come too soon
You see that frozen hillside burnt like gold and the day will come too soon
