

I Know the Reason

Carbon Leaf

You talk tough to me and it makes me smile
By the old church yard your feelings hide
I know the reason and you won't say
"If we grow too close, will you push away?" I know the reason
And I like, that we're the same
Waterfall Are you afraid to love? You afraid to smile?
From the inside out, to the open wide?
I know the feeling, you're way too proud
And will they find you out if you laugh out loud? I know the reason
And I like, that we're the same
Waterfall I know, that we're the same
Waterfall, umbrella in the rain
And I won't ask why, I know the reason
I thought you should know, I know the reason I'll never be the same
I clearly see umbrella in the rain over you and me
You are the best thing, let it show
And if we grow to close, let it undertow, this is the best thing I know the reason
And I like, that we're the same
Waterfall Should we fall down?
Fall down, fall down, fall down
Fall down, fall down I know the reason
And I like, that we're the same
Waterfall
