

# Storming The Burning Fields

## Dragonforce

Bursting through the fires avenging  
Fatal warning battles are raging  
Power of darkness rise for the fight  
We'll be strong and stand our ground  
Death is all around us and my heart is beating weaker  
Fight the day with power of immortal souls arise  
Fire in our hearts, the evil rages on forever more  
Burning until the battle rage is gone  
Through damnation we rise, sign of the times  
Master of bleeding eyes  
Thunder on high, look to the sky  
You never gonna take us down  
And we will crush the evil standing  
On the temple in the fire storming  
We fly beyond the lost horizons high  
Heroes of the night are calling  
See the promised land is falling  
Reaching for the powers deep inside on through the night  
Blinded by the hate and desire  
Burning in your heart like a fire  
Challenging all the suffer and fear  
Our horizons take control  
Blood spills all around us and our enemies draw nearer  
Sacrifice your life to have them carry you away  
Take us to the place of death and carry on forever more  
Burning on the dreams of memories long gone  
And you'll die for your crimes, sign of the times  
Master of endless lies  
Fight to the end, now we ascend  
Together we will take them down  
And we will crush the evil standing  
On the temple in the fire storming  
Fly beyond the lost horizons high  
Heroes of the night are calling  
See the promised land is falling  
Reaching for the powers deep inside on through the night  
And we will crush the evil standing  
On the temple in the fire storming  
Fly beyond the lost horizons high

Heroes of the night are calling  
See the promised land is falling  
Reaching for the powers deep inside on through the night
