

Gone Today

SOJA

When I look to see the sun, I can feel positive and negative at once
Cuz it could be a brand new day or the same old one
So I wait just to see exactly what kind of day its gonna be
I can feel that either way I, I guess I got luckyCuz I could be gone today, tomorrow could be close or it could be
so far
away

And I guess what im trying to say, if you can hear me now just know I'm so
so happyWhen I look the see the moon, I can feel those before me who've all done it
too

I can see through all me troubles and somehow they got thru
cuz were all family even if we don't act like it or just don't see
I guess Im thankful for who you think we could be
Cuz i could be gone today, tomorrow could be close or it could be so far
away

And i guess what im trying to say, if you can hear me now, just know i'm so
so happy, todayThere could maybe be something else
Not something you see or touch but something that you felt
And there could maybe be a road

Like underground sin, it stays in the corners of my soul
Cuz i could be gone today, tomorrow could be close or it could be so far
away

And i guess what im trying to say, if you can hear me know just konw I'm so
so happy

Cuz i could be gone today, tomorrow could be close or it could be so far
away

And i guess what im trying to say, if you can hear me now just konw I'm so so
happy
