You Gotta Move

Heatmiser

you gotta moveyou gotta move
you gotta move
i'll show you what you should do
you gotta move this way
and everything's gonna be okay
it's a chemical bliss and a stranger's kiss
you always lose your color and fall
you just move, that's allyou're just below dallas town
where the sky burns bright white
i watched the sun go down
and the moon lights you up like a spotlight
so stumble and trip down the broken strip
with your planet packed in your car
you just move, don't go farstarting to spin in your circle again
so pull the hammer back, that's a start
and just move, pull me apart
you gotta move
you gotta move
i'll show you what you should do
you gotta move this way
and everything's gonna be okay
it's a chemical bliss and a stranger's kiss
you always lose your color and fall
you just move, that's allyou're just below dallas town
where the sky burns bright white
i watched the sun go down
and the moon lights you up like a spotlight
so stumble and trip down the broken strip
with your planet packed in your car
you just move, don't go farstarting to spin in your circle again
so pull the hammer back, that's a start
and just move, pull me apart
