The Heat Goes On

Icon

You walk tall, got your head in the clouds
You talk soft but you're thinkin' aloud
And you know exactly what you want
You talk shy, you're hard to get
You got the face that I can't forget
And I know, I know the heat goes on
I know that the heat goes on
I know that the heat goes on
You play tight, you're nobody's fool
You're not cold but I know that you're cool
Look at you, I know the heat goes on
Now tell me with your hand on your heart
That you knew you were right from the start
And you're sure you felt it all along
You know that the heat goes on
You know that the heat goes on

Times to decide, times that I've lied
Problems will never be solved
Which way is wrong, which could be right?
This heat will always go on, on and on
You walk tall, got your head in the clouds
You talk soft but you're thinkin' aloud
And you know exactly what you want
You talk shy, you're hard to get
You got the face that I'll never forget
You and I know, we know the heat goes on
You know that the heat goes on
You know that the heat goes on
You know that the heat goes on
You know that the heat goes on
