Lost in Time

Wyclef Jean

See the stars, I feel the moon
Look so far but feel so close
Someone pinch me, I'm dreaming
L-O-V-E That's all we know
And dancing to our favorite tune
This is just a beginning
Who sent you to me?
How did you know that I would be the right one?
Yeah x4
Here, comes the rain, hurricanes, tornadoes, earthquakes, I get but know love ain't stronger than you
Here, comes the rain, hurricanes, tornadoes, earthquakes, I get but know love ain't stronger than you
We have crossed a some canals, miles, and we've walked 10 thousand miles
You're the reason I'm breathing
Wait forever, here and now
Curtains close, take a bow
You're someone I can believe in
Who sent you to me?
How did you know that I would be the right one?
Yeah x4
Here, comes the rain, hurricanes, tornadoes, earthquakes, I get but know love ain't stronger than you (here comes the rain)
Here, comes the rain, hurricanes, tornadoes, earthquakes, I get but know love ain't stronger than you
Lights out, bridges down, dark clouds, but you're around and I know
Love ain't stronger than you
The city flooded, the ocean dropped, loves the reason we're alive
Love ain't stronger than you
