

# I Just Want to Touch You

## Utopia

There's a flame in the back of my mind  
And it's burnin' for you all the time  
'Cause I just wanna touch you  
Do you want to touch me too? Now I know that you've heard this before  
But with me it could mean something more  
And I just wanna touch you  
Do you want to touch me too? Everybody says we're too young  
But I know all the things that they just can't see  
I just wanna get inside you  
If you'll just give a minute to me, ooh So I've said everything that I can  
And I'm hoping that you'll understand  
That I just wanna touch you  
And you want to touch me too, ooh Everybody says we're too young  
But I know all the things that they just can't see  
I just wanna get inside you  
If you'll just give a minute to me, ooh So I've said everything that I can  
And I'm hoping that you'll understand  
That I just wanna touch you  
And you want to touch me too I just wanna touch you  
And you want to touch me too
