Ladies And Gentlemen We Are Floating In Space

Spiritualized

All I want in life's a little bit of love to take the pain away
Getting strong today, a giant step each day
All I want in life's a little bit of love to take the pain away
Getting strong today, a giant step each day
I've been told only fools rush in, only fools rush in
(All I want in life's a little bit of love to take the pain away)
(Getting strong today, a giant step each day)
But I don't believe, I don't believe
(All I want in life's a little bit of love to take the pain away)
I could still fall in love With you
(Getting strong today, a giant step each day)
I will love you till I die, and I will love you all the time
So please put your sweet hand in mine
And float in space and drift in time
All my time until I die, we'll float in space just you and I
(All I want in life's a little bit of love to take the pain away)
(Getting strong today, a giant step each day)
I will love you till I die, and I will love you all the time
(All I want in life's a little bit of love to take the pain away)
(Getting strong today, a giant step each day)

All my time until I die, we'll float in space just you and I
(All I want in life's a little bit of love to take the pain away
(Getting strong today, a giant step each day)
I will love you till I die, and I will love you all the time
(All I want in life's a little bit of love to take the pain away
(Getting strong today, a giant step each day)
I'll love you to death, I guess that's what you get
And I don't know where we are all going to
Love don't get stranger, it is what it is
And I don't know where we are all going to
Everything happens today, and that's what you get
And I don't know where we are all going to
All my time until I die, we'll float in space just you and I
(All I want in life's a little bit of love to take the pain away)
(Getting strong today, a giant step each day)
I will love you till I die, and I will love you all the time
(All I want in life's a little bit of love to take the pain away)
(Getting strong today, a giant step each day)
