

In Love (Live In Stockholm 2011)

Grave

You lie so nice in front of me
As I brought you from your grave
You lost some skin and a lot of weight
But still you look sexy in your new shape
People blame me for being insane
But I am just in love
Why doesn't anybody understand
That sickness is my command
Every morning I think you are there
I can still feel the warmth from your body
I've missed you for far too long
That's why I bring you back where you belong
People blame me for being insane
But I am just in love
Why doesn't anybody understand
That sickness is my command
I have thoughts of commit suicide
So I can be where you are now
Where you are I want to be
That's why I bring you back to me
When we get home, I'll split your legs
On this dark day of desecration
I love you as much now as back then
When you were alive and loving wife
After this I'll try again
To pull the trigger and make my day
