

# Dark Waves

## Robot Koch

Cold is the night, when the skies collapse  
And its so real, surreal  
Cos it feels like i've been drowning in a dream again again  
Deep swallowing the memories that suffocate  
Drowning in the waves of a no man's land  
Behind then world is falling out of everything  
A lone sailor through the deep  
The moon is resting grave above the water  
A rider of the dark waves  
Shadows underneath Fleeting with godspeed  
I'm a rider of the Dark waves  
Cold is the sea, when the waves collapse  
And its so real, surreal  
The moon is resting grave above the water  
A rider of the dark waves  
Shadows underneath  
Fleeting with godspeed  
I'm a rider of the Dark waves  
Rider of the dark waves  
Kill me with your light  
Rider of the dark waves  
Kill me with your light  
Rider of the dark waves  
Kill me with your light  
Rider of the dark waves  
Kill me with your light
