

Voodoo

Oh Land

You changed your silhouette
You cast another shadow
You're speaking like scissors
Cutting out a foreign patternAll the things you do
Affecting my behavior
No doctors got me diagnosed
No science proves a safe cureIt's voodoo you do
There's needles everywhere
It's voodoo you do
There is fire in the air
All the noise will disappearIt's voodoo you do
There's needles everywhere
It's voodoo you do
I go higher in the air
I'm possessed when you are nearI love the color red
It is for love, it is for deathIt is my ritual
I see it as my duty
Seduction is an art
You can see through all the beautyI know you wonder why
I'm so afraid of learning
If I give in to you
There is no returningIt's voodoo you do
There's needles everywhere
It's voodoo you do
There is fire in the air
All the noise will disappearIt's voodoo you do
There's needles everywhere
It's voodoo you do
I go higher in the air
I'm possessed when you are nearOoh, electrodes
Disturbing the activity
In my brain
Just a few more diodes connectedAnd the smiles are coming back
Again, again, again
Ooh, electrodes connecting
And tuning you inI love the color red
It is for love, it is forVoodoo, there's needles everywhere
It's voodoo you do
There is fire in the air

All the noise will disappear
It's voodoo you do
There's needles everywhere
It's voodoo you do
I go higher in the air
I'm possessed when you get near
There's needles everywhere
There's needles everywhere
There's needles everywhere
There's needles everywhere
There's needles everywhere
There's needles everywhere
There's needles everywhere
There's needles everywhere
