There's A Key (Radio Version)

2 Brothers On the 4th Floor

There's a key to open doors.
To look inside, what life has got to hide.
Find that key and you will see.
That you'll be shocked, the door is unlocked.
You, you own the key to open the door, door.
Take it and don't break it you will make it for sure, sure.
Be yourself and no one else and set yourself free, free.
Open up your door when you find this key.
There's a key to open doors.
To look inside, what life has got to hide.
Find that key and you will see.
That you'll be shocked, the door is unlocked.
I got you me everybody got the key.
Turn the key and you will find a change in mentality.
Let it go and take it slow and set yourself free, free.
Open up your door when you find this key.
There's a key to open doors.
To look inside, what life has got to hide.
Find that key and you will see.
That you'll be shocked, the door is unlocked.
