

# Role Play

## Ginuwine

Let's play a little game, a forte  
Here's a little fantasy and role play  
No lips ever the same, so let's play  
A little fantasy and role play First take, come right in and take off your skirt  
Sit right down and let 'G' go to work  
'Cause, being my patient has its perks  
Come and show the doctor exactly where it hurts You say the pain, it hurts right there  
So come and lay it down, yeah, right over here  
You see with me, the fun will never end  
Playin' my little game of role play pretend Let's play a little game, a forte  
Here's a little fantasy and role play  
No lips ever the same, so let's play  
A little fantasy and role play Take two, come right in with the handcuffs on  
I planned a lot of kinky stuff to the break of dawn, yeah  
We're gonna do it nice and rough 'til your fears are gone  
I'm a be the one to flip it up and rub it down and that's my wore, it's bond 'Cause I'm your master and you're  
my slave  
Everything I say you will obey  
You see with me, the fun will never end  
Playin' my little game of role play pretend Let's play a little game, a forte  
Here's a little fantasy and role play  
No lips ever the same, so let's play  
A little fantasy and role play Now I can be your cowboy, ride in my rodeo  
I can be your dancer, baby, see my exotic show  
I can be your teacher and you can be my pet  
Or I can be you director, baby, get naked on the movie set Whatever your fantasy, whatever your dream  
Just set the stage, girl and let's start the scene  
Tonight's the night, I'm gonna give into you, yeah  
The way you wish those other guys would do Let's play a little game, a forte  
Here's a little fantasy and role play  
No lips ever the same, so let's play  
A little fantasy and role play Let's play a little game, a forte  
Here's a little fantasy and role play  
No lips ever the same, so let's play  
A little fantasy and role play Let's play a little game  
Fantasy and role play
