

# Have Faith

[DJanecy](#)

Climb all your mountains to see what you see  
Fly, all you warriors, and don't fear the skies  
Ask all your prophets and then you decide  
Heed all your warnings and see through the night  
Feel the ice is melting, see it burning down  
Hear the answers calling, look until they're found  
Dance, all you dreamers and lovers of life  
Know that there's more than just black or white  
Shed your disguises and don't criticize  
Seek all your answers and sleep through the night  
Feel the ice is melting, see it burning down  
Hear the answers calling, look until they're found  
Feel the ice is melting, see it burning down  
Hear the answers calling, look until they're found  
Feel the ice is melting, see it burning down  
Hear the answers calling, look until they're found  
The answer lies inside  
The answer lies inside  
The answer lies inside  
The answer lies inside  
Have faith
