Versus the World

Amon Amarth

One we were scum of the earth
Now we've cleared our names
In Nifelheim came rebirth
Baptized in Mount Doom's flamesA decade now we've fought this war
Never yielding from our path
Our journeys take us to foreign shores
Where we let our metal blastWe've been battered and left for dead
We've been beaten and we have bled
But we always made it through
Vs the worldThis may be our last quest
Before we're put to rest
The end is coming soon
Vs the worldWarriors of the grave tooks us south
Hell bent on genocide
They made us face the brutal truth
This would be no easy rideGrotesque creatues of the sky
Met with us on winter fields
Christian God cast aside
Massacre of hallowed eveWe've been battered and left for dead
We've been beaten and we have bled
But we always made it through
Vs the worldThis may be our last quest
Before we're put to rest
The end is coming soon
Vs the worldPersian demons brought us south
On merciless campaign
We've raided the western shores
Always going against the grainAll these years we've fought to win
And sometimes almost died
I tell you now we won't give in
Without a vicious fightWe've been battered and left for dead
We've been beaten and we have bled
Vs the world
