Silver Shadow (Live In London)

Incognito

Silver shadow
Silver shadow, a glowing shadow shining brightly for all to seeI remember gazing on this quiet night, the stars were bright as they could be
Wonderin' if things would ever go right and if there was a spot up there for me
Then one star got brighter by the minute
Strange that it seemed to have my name written in it
I reached for the star and it kissed me with its light
It made me cast a shadow that was silver and brightSilver shadow, a glowing shadow shining brightly for all to seeI never had any real reason to thank my lucky stars
But now I've got a pretty good reason 'cause I know I'm gonna go far
I believe in magic, I really do
With all that's happened, it's got to be true
I cast a silver shadow from the kiss of the light
I knew that I was destined starting with tonightSilver shadow, a glowing shadow shining brightly for all to see
Silver shadow, my future's shadow trying to tell me of the star I would beSince I was chosen among the rest, I dedicate myself, I'm gonna be the very best
And my shadow forever silver will remain and the world will always remember my nameSilver shadow
A glowing shadow
Shining brightly
For all to seeSilver shadow, a glowing shadow shining brightly for all to see
Silver shadow, my future's shadow trying to tell me of the star I would beHey, yeah
Look at my shadow glow
Silver and wonderful sparkling thing
Look at my shadow glow
Think I'm gonna be a star
Look at my shadow glow
Glowin' so brightly, this wondrous thing
Look at my shadow glow
Look at my silver shadow
