

Silver Shadow (Live In London)

Incognito

Silver shadow

Silver shadow, a glowing shadow shining brightly for all to see
I remember gazing on this quiet night, the stars
were bright as they could be

Wonderin' if things would ever go right and if there was a spot up there for me

Then one star got brighter by the minute

Strange that it seemed to have my name written in it

I reached for the star and it kissed me with its light

It made me cast a shadow that was silver and bright
Silver shadow, a glowing shadow shining brightly for all to
see
I never had any real reason to thank my lucky stars

But now I've got a pretty good reason 'cause I know I'm gonna go far

I believe in magic, I really do

With all that's happened, it's got to be true

I cast a silver shadow from the kiss of the light

I knew that I was destined starting with tonight
Silver shadow, a glowing shadow shining brightly for all to see

Silver shadow, my future's shadow trying to tell me of the star I would be
Since I was chosen among the rest, I
dedicate myself, I'm gonna be the very best

And my shadow forever silver will remain and the world will always remember my name
Silver shadow

A glowing shadow

Shining brightly

For all to see
Silver shadow, a glowing shadow shining brightly for all to see

Silver shadow, my future's shadow trying to tell me of the star I would be
Hey, yeah

Look at my shadow glow

Silver and wonderful sparkling thing

Look at my shadow glow

Think I'm gonna be a star

Look at my shadow glow

Glowin' so brightly, this wondrous thing

Look at my shadow glow

Look at my silver shadow
