habib

LARAXAN

Love is where I'd like to spend time away from you
Lost the weakest part of this taking over me
I can't ease your mind and nothing goes away
Harder to move on and easy to stay away
Float above the world and yet I still can't find it
Then I burned myself in wax, Jesus candle red
You can ease your mind and it will be your friend
We should disappear and then we won't fade away
I can't go on, can't get away all that I, I love is part of my pain
Giving up
You can ease your mind and it will be your friend
We should disappear and then we won't fade away
I can't go on, can't get away, all that I love is part of my pain
Or let's watch our lives taken away our love is dead
But can't find a grave giving up
