

# Step out into the Light

## Matisyahu

Here we go, you and me  
Putting out fires with gasoline,  
Nothing ventured, nothing missed,  
How did it all come to this?  
No I can't, no I can't go on,  
Searching for sunlight  
But the darkness takes holdMy eyes shut, but still I see  
Neverending fuel of chemistry  
Chest so tight that we can't breathe  
So don't put it all down to me  
No I can, no I can't go on  
Searching for sunlight  
But the darkness takes holdI open my eyes  
Step into the light  
The walls in my mind  
But I can climb  
In the darkest of days  
When I think I've lost my way  
I step into the light  
I open my eyes  
Step into the light  
The walls in my mind  
But I can climb  
In the darkest of days  
When I think I've lost my way  
I step into the light
