

# Let's Go Back

Shai

Back in the days  
Back in the days  
Girl to think back  
Back to the days  
When we fell in love  
And I keep thinkin of it sugar  
I saw your face  
Then I knew  
I had to have you for sure  
You felt the same baby  
And so we got it on  
All the rest were gone  
It was just me and you together  
So baby let's go back  
Girl let's go back  
To how it used to be  
Don't rush anything  
Let's take it slow  
Make sure that we know  
There's how far to go  
It's been so long  
Since I've held you in my arms  
And it felt so good  
When we used to talk all night  
We'd make love on the phone until the sunlight came  
And girl make no mistake  
About it we were made  
For each other  
There'll never be another  
So baby please, let's go back  
Girl let's go back  
To how it used to be  
Don't rush anything  
Let's take it slow  
Make sure that we know  
There's how far to go  
To things we ain't done in years  
Bust rise the great adventures with my blue stuffed teddy bears  
Girl I loved the way that used to be

Catchin quickies in the living room while moms asleep

Ain't no woman like the one I got

Body so hot that I gotsta give her? shot

So when I pull up to her spot, 325 drop

Me and my dime reminisce all the time

Girl let's go back

To how it used to be

Don't rush anything

Let's take it slow

Make sure that we know

There's how far to go
