

Out Tonight

The Flaws

oh why, we really should go out tonight
as the band finished playing we dont really have to stay
to right i dont think you've got any idea
what it takes just to make up and break up the day

we could go out tonight
we could go so damn far
put your faith to the pedal and drive you away
we could go out tonight
we could go so damn far
put your faith to the pedal and drive you away

oh why, i thought we could stay and fight
you dont hear what there saying behind those eyes
and if i thought about it long enough
i just might i just might i just might

we could go out tonight
we could go so damn far
put your faith to the pedal and drive you away
we could go out tonight
we could go so damn far
put your faith to the pedal and drive you away

put there aint no way

we could go out tonight
we could go so damn far
put your faith to the pedal and drive you away
we could go out tonight
we could go so damn far
put your faith to the pedal and drive you away
