

Waited Too Long

Memory Dean

Why all this notions
and my youngest charades?

My proud professions
and my pity parades

And your perception
that is what I have made

It's so much easier now
to admit I was afraid

Waited too long
(waited too long)

waited too long
(waited too long)

too much to believe in this
so long
needed some relieve form this
right or wrong
Wanted to be everything that you needed
Wanted to be everything you were dream'n of
I still feel
so strong
Waited too long

I just wanted to be that smile on your face

But does surrender and the time never found their place

And so the tide is turning on me again

Oh I know what could have been

Waited too long
(waited too long)

Waited too long

(waited too long)

too much to believe in this
so long
needed some relieve form this
right or wrong
Wanted to be everything that you needed
Wanted to be everything you were dream'n of
I still feel
so strong
Waited too long

I know we both wanted better
roaming through such stormy weather
tell my foolish pride:

Waited too long
fires were fading
Waited too long
I'm still waitin'
Too much to believe in this
for so long
needed some relieve form this
right or wrong
Wanted to be everything that you needed
Wanted to be everything you were dream'n
I still feel
so strong
Waited too long
