

# Spirit

## Future Islands

Trusted, repeated  
Candor, uneven “ in it”s the will to find  
The right design  
The form belongs, to no one  
Holding truth

Come see me through  
Come through the sea  
To share  
And bare  
The light inside of you

Don’t cast away, don’t cast away  
Don’t let them cast a role for you

Find the sun, force the moon  
Loose the earth  
For dreams come to those who let them in their guarded room  
Open wide your winged-eye  
Spirit drives “ to catch the truth  
For spirit thrives where darkness comes to challenge you

Be more than words  
Be more than strength and kind  
Be love and blind  
To those who come to you

Sing something new  
Belief is wet and ghost  
Yet, loves the most of what we do

Don’t cast away, don’t cast away  
Don’t let them cast a role for you

Find the sun, force the moon  
Loose the earth  
For dreams come to those who let them in their guarded room  
Open wide your winged-eye  
Spirit drives “ to catch the truth

For spirit thrives where darkness comes to challenge you

Those winter days  
Those winter nights  
Those days and those nights

Come see me through  
Come through the sea  
To bare  
And share  
The light inside of you

Donâ€™t cast away, donâ€™t cast away  
Donâ€™t let them cast a role for you

Find the sun, force the moon  
Loose the earth  
For dreams come to those who let them in their guarded room  
Open wide your winged-eye  
Spirit drives â€“ to catch the truth  
For spirit thrives where darkness comes to challenge you

Challenge you, challenge you  
Challenge You
