

# How Far This Can Go

## Bowling for Soup

It's cold outside, light a fire  
Throw our past mistakes into the flame  
We can watch them burn  
Lay down your head, close your eyes  
Tomorrow's gonna be a brand new day  
and the tide is gonna turn So hold on and be strong  
Nothing's ever gonna bring us down  
It's not too late to turn this thing around Let's take it fast to slow  
Hold our breaths and jump into whatever this is  
Grab a coat and let it all rain down  
If we're never stop believing, it's gonna be alright  
But if we don't try, we may never know  
How far this can go Start the car, hit the gas  
Drive forever never looking back  
Leave the world behind  
Fly so high, touch the sun  
Hurry up, you know life goes so fast  
We're running out of time So hold on and be strong  
Nothing's ever gonna bring us down  
It's not too late to turn this thing around Let's take it fast to slow  
Hold our breaths and jump into whatever this is  
Grab a coat and let it all rain down  
If we're never stop believing, it's gonna be alright  
But if we don't try, we may never know  
How far this can go By the time the curtain's falling  
There'll be standing under and screaming out our names  
Can't you hear the future calling  
Will go all the way and never be the same, yeah So hold on and be strong  
Nothing's ever gonna bring us down  
It's not too late to turn this thing around Take it fast to slow  
Hold our breaths and jump into whatever this is  
Grab a coat and let it all rain down  
If we're never stop believing, it's gonna be alright  
But if we don't try, we may never know  
How far this can go  
How far this can go  
How far this can go
